

How to care for your **MATRIX®** scarf

Dirt spots

- Wash by hand using a mild detergent
- Move the scarf around while washing, don't let it lie in the water
- Rinse with cold water, adding a dash of white vinegar on the last rinse

Grease stains

- Dab stain with benzine (available at the chemist's) → Then soak the whole scarf in diluted benzine → No rinsing necessary → Dry and iron → Gentle dry cleaning is possible → Don't bleach

Ironing

- Steam iron on reverse side
- Caution: the rolled hem shouldn't be ironed flat! → The rolled hem, sewn by hand, is an indication of quality

Drying

- Don't wring → Lay out flat on a towel to dry → Don't hang to dry and avoid using pegs → Don't put out in the sun to dry

Storing woollen scarves during the summer months

- Air well before storage → Store with moth repellent → Store in a sealable plastic bag
